

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 10, line 23, with the following amended paragraph:

If it is an element recognized by the language, the processing unit processes the element accordingly, block 230. As described earlier, in one embodiment, the language element may be an invocation invoking a library function of the language. If so, the library function is invoked and executed accordingly. The library function may be local or remote, and invoked in a namespace based approach. Invocation of function in a namespace based approach is the subject matter of Patent Cooperation Treaty (PCT) patent application number US01/46712 ~~<to be insert>~~, entitled "Namespace Based Function Invocation", contemporaneously filed, and published on May 16, 2002 ~~<insert date>~~, which claims priority to the earlier enumerated U.S. provisional patent application 60/246,916. PCT Application US01/46712 Application has subsequently entered the U.S. National Stage, Application Number 10/089,139. Readers are referred to the PCT US01/46712 or US 10/089,139 ~~<xxx>~~ application for further details.
